New Business

-Web and IT Administrator position description

Dominique Granger reviewed the position description which was very recently reclassified from the IT Specialist description. The specialist position was recently vacated when Zach Henderson moved to SHARE as a Circulation & Resource Sharing Specialist. The reclassification was based on current and near future projects for the IT department.

The position went through our internal salary classification review and it is now considered a Level 8. We are looking for a team member with working knowledge of the skills described, and not necessarily a master of those skills. Our goal is to have the successful candidate grow in the role.
