

DREAM GRANT REPORT  
November, 2014

Since the Dream grant was announced, the initial push from system staff was to make sure that every public library was aware of this opportunity. We have been delighted with our new transitional school and academic libraries, but the focus until this point in time, has been on the public libraries.

System staff has communicated with library directors and board presidents. Additionally, staff was very pro-active in setting up site visits that would allow board members and directors to all be apprised of the opportunity and ask questions as they arise.

As of November 20, 2014, this is the automation profile of our public libraries:

Full Public Library Members:	227
Public Library Transitional Members	18
Public Libraries Using Stand-Alones	11
Public Libraries w/no Automation	19
Full Public Library SHARE Members	179
Full SHARE and Transitional Members	197
